8-- SOURCE INFORMATION BLOCK

Definition and Scope of Fields

This block contains information concerning the agencies responsible for the record and cataloguer's notes recorded by those agencies. Cataloguer's notes are primarily intended to guide cataloguers and thus are usually not written in a form suitable to public display. Notes intended for public display are in the 3-- NOTES BLOCK.

The following fields are defined:

801 ORIGINATING SOURCE
810 SOURCE DATA FOUND
815 SOURCE DATA NOT FOUND
820 USAGE OR SCOPE INFORMATION
822 CORRESPONDING DATA IN OTHER SYSTEMS
825 EXAMPLE UNDER NOTE
830 GENERAL CATALOGUER'S NOTE
835 DELETED ACCESS POINT INFORMATION
836 REPLACED ACCESS POINT INFORMATION
856 ELECTRONIC LOCATION AND ACCESS
886 DATA NOT CONVERTED FROM SOURCE FORMAT

Occurrence

Field 801 is mandatory. All other fields in the 8-- block are optional. It is recommended that all notes in a source record suitable for international exchange be entered in the UNIMARC record.

Notes on Field Contents

Punctuation should be entered as in the source format.

The use of the control subfields is described in a special section immediately preceding the 2-- AUTHORIZED ACCESS POINT BLOCK description.

~~Control Subfields~~

~~The following control subfield may be used in the 8-- fields:~~

~~$2 System Code~~
